Android

Welcome to the wonderful world of Android!

The TV Box was designed so you can use content you can't find in the Play Store too! Find your alternative content on the Internet using other app stores and browse your favorite websites.

A whole range of video formats

The TV Box includes a whole range of codecs to provide a better video quality and an higher viewing experience.

Got some 3D MKV file on your flash drive or an HDD from a "friend"? The TV Box is a full featured multimedia player with 3D playback capability to help you enjoy your multimedia content.

Multimedia Player

Miracast function

Wirelessly mirror all of your multimedia content from your mobile devices/PC to your TV screen and enjoy your videos, photos, games and music.

Free live TV

Because it's still a TV...

Equipped with a DVB-T1 tuner and preloaded with the TV app, to enjoy your favorite channels and programs.

**TV channels available in your area*

Manage your time as you wish

Need a break? Or not available to see your favorite program? No problem! With the timeshift function, you can easily pause and restart the program where you left off. And with the recording function, simply record the program you wish to enjoy it at an other time.

* A USB flashdrive or an HDD must be plugged to allow timeshift and recording functions.
