

1. Open the « Classic Boy » App in the « Retro Gaming » section of your GEM Box :

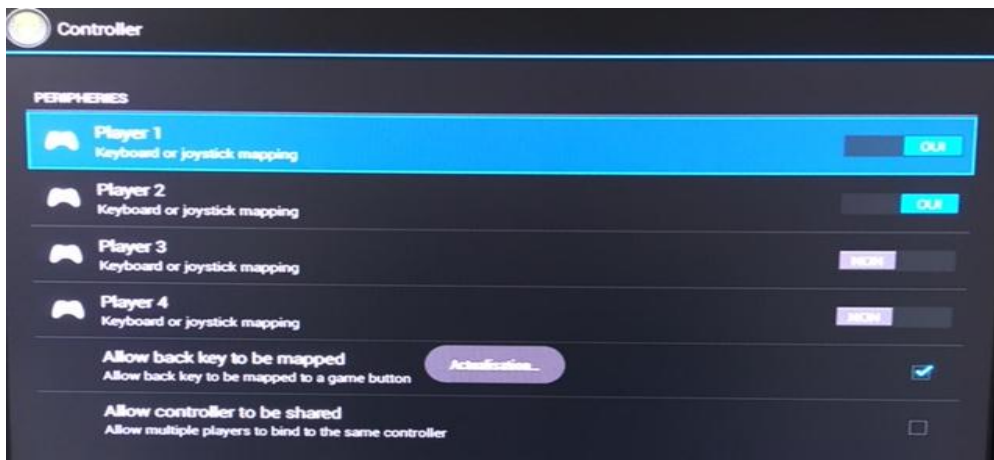

2. Click on the « Settings » icon in the top right hand corner of your screen.

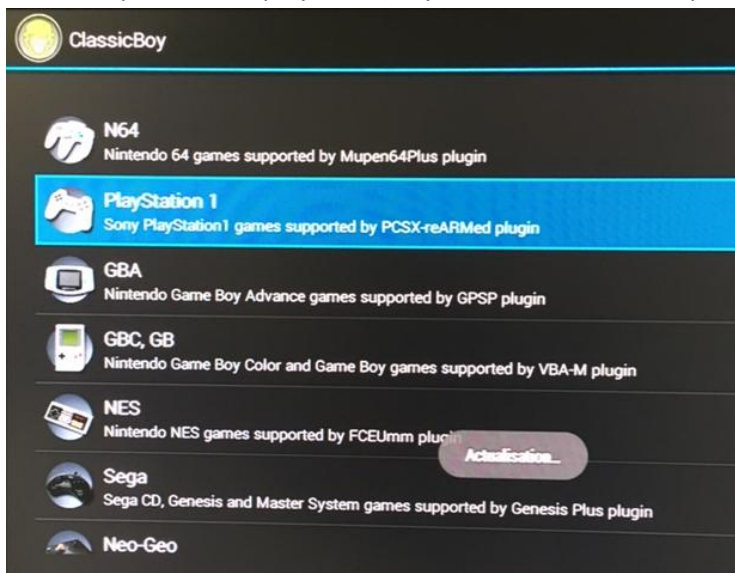

3. Then select "Controller":

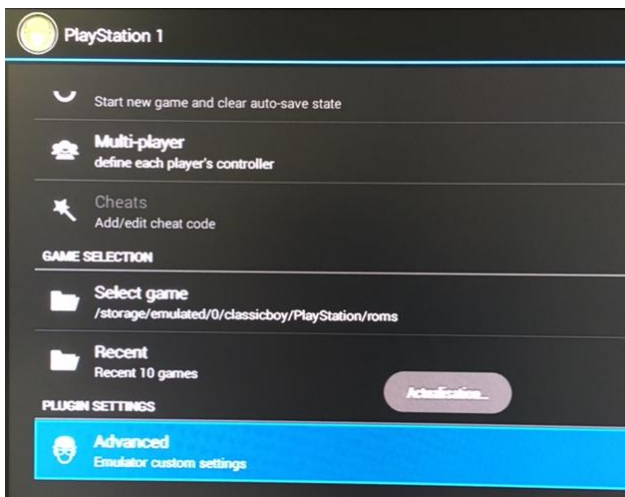

4. Select the number of players you wish to set up by pressing the appropriate option for several seconds (1 player in the example below). If you activate 2 players, you will have to map 2 GEM Pads for each game, 3 for 3 players, 4 for 4 players.

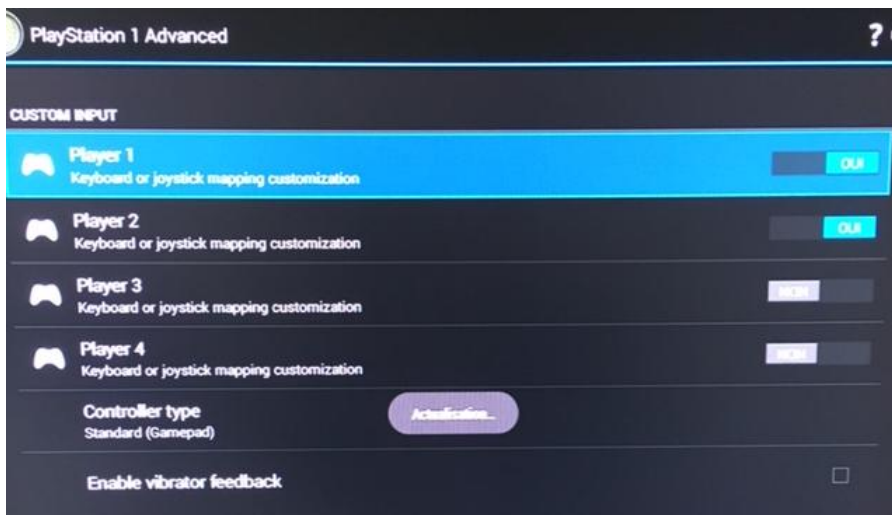

5. Go back to the emulators list by pressing the "Back" or "B" button. Choose the console emulator you wish to play with (PlayStation 1 in the example below):

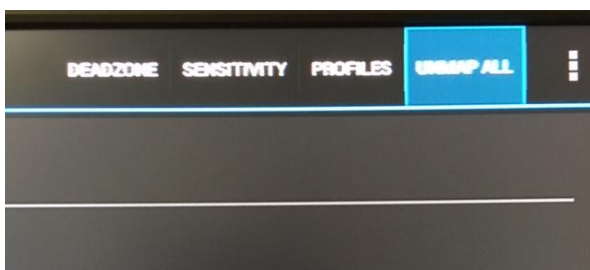

6. Then select the “Advanced” option in “Plugin Settings” :

7. Select the same number of players as you have selected in step 4. Then open the activated player.

8. Click on the «UNMAP ALL » button in the top right hand corner of your screen.

9. Start mapping your buttons by selecting the buttons one at a time.

Press « A » to determine the action to map (« Up » in the example below), and then press the button you want to map. Finally, press “B” to finish the mapping.
